Written exam

Choose one answer per question. Mark your choices on the student answer sheet.

1. What baseline instruction applies to a construction employee operating a chain hoist?

A. Only a general employee orientation
B. Crane certification for every hand-operated hoist
C. Only a supplier demonstration
D. Recognition and avoidance of applicable hazards and applicable regulations

2. How does Subpart CC treat machinery that hoists by using a come-a-long or chainfall?

A. It is covered whenever the chain is longer than ten feet
B. It is subject to the crane operator rule in all cases
C. It is excluded by §1926.1400(c)(10)
D. It is covered only during the first lift of a shift

3. What is the Subpart CC scope treatment for telescopic or hydraulic gantry systems?

A. Always covered when rented
B. Always covered when placed indoors
C. Covered whenever two workers assist
D. Excluded by §1926.1400(c)(6)

4. When can a construction forklift configuration come within Subpart CC?

A. Whenever a trained operator uses reverse
B. When configured to hoist and lower by winch or hook and horizontally move a suspended load
C. Whenever the truck crosses a roadway
D. Whenever forks carry palletized material

5. Which standard's powered industrial truck training requirements apply in construction through §1926.602(d)?

A. §1926.1428
B. §1926.1432
C. §1910.178(l)
D. §1910.184

Written exam

Choose one answer per question. Mark your choices on the student answer sheet.

6. Which three methods make up required forklift training?

A. Formal instruction, practical training and evaluation of performance in the workplace
B. Written exam, annual lecture and external licensing
C. Classroom attendance, equipment delivery and a supervisor signature
D. A video, a manufacturer warranty and a license

7. Who may train and evaluate powered industrial truck operators?

A. People with the knowledge, training and experience to train operators and evaluate competence
B. Any supplier who delivered the truck
C. Any coworker with site access
D. Only an OSHA inspector

8. When may a trainee operate the truck?

A. Under direct supervision of a person qualified to train and evaluate, where operation does not endanger anyone
B. Whenever the parking brake works
C. With a passenger giving directions from the forks
D. Alone if the aisle is empty

9. Which is a truck-related topic?

A. The emergency contact list for an unrelated site
B. The shift payroll deadline
C. Crew uniform colors
D. Vehicle capacity and stability

10. Which is a workplace-related training topic?

A. Card expiration rules for crane signal persons
B. The tested capacity of a separate crane
C. Pedestrian traffic and restricted aisles
D. The truck manufacturer's history

Written exam

Choose one answer per question. Mark your choices on the student answer sheet.

11. What is the minimum frequency for evaluating forklift operator performance?

A. Only once at hiring
B. At least once every three years
C. Only after an accident
D. Every five years

12. What action follows a forklift near miss involving the operator?

A. Replace the truck's identification plate only
B. Cancel all training permanently
C. Relevant refresher training, including evaluation of its effectiveness
D. Wait for the routine three-year evaluation

13. An operator is assigned a different type of truck. What is required?

A. Keep using the old record alone
B. Relevant refresher training, including evaluation of its effectiveness
C. Replace the truck's key with a new key
D. Repeat only the pedestrian handout

14. Which information is required for the employer's forklift training and evaluation certification?

A. Operator name and the employer's insurance policy number
B. Operator name and model year only
C. Truck serial number and lift weights only
D. Operator name, both dates and the identity of each trainer or evaluator

15. When may prior forklift training on a topic be credited?

A. When the trainee holds any crane certification
B. When the course took at least eight hours
C. When appropriate to the truck and conditions and the operator has been evaluated and found competent
D. When the former employer used the same training vendor

Written exam

Choose one answer per question. Mark your choices on the student answer sheet.

16. What overhead hoist limit must the user observe?

A. The manufacturer's indicated safe working load
B. A limit selected by the operator after loading
C. The rated capacity of any nearby crane
D. An estimated weight based on hoist size

17. What is required of the supporting structure for an overhead hoist under §1926.554(a)(2)?

A. An unverified estimate from the installer
B. A safe working load equal to that of the hoist
C. A matching manufacturer label only
D. A rating based only on the lightest expected load

18. How should the overhead hoist be located relative to the operator?

A. So the operator can stand under the load to guide it
B. So the operator can stand clear of the load at all times
C. So the operator can ride with the load
D. So the operator must enter the load path during travel

19. What governs applicable installation, testing, inspection and operation requirements for overhead hoists in use?

A. The capacity of the largest forklift on site
B. The last operator's preference
C. Only the plant work schedule
D. The manufacturer's prescriptions

20. May equipment covered by §1926.1441 be used to hoist personnel?

A. Yes, if any supervisor approves
B. Personnel hoisting is prohibited under that section
C. Yes, if the load is under 2,000 pounds
D. Yes, if a signal person is used

Written exam

Choose one answer per question. Mark your choices on the student answer sheet.

21. For equipment covered by §1926.1441, what training is required before an operator uses it?

A. Safe operation of the type of equipment the operator will use
B. A standard forklift lecture instead of equipment training
C. Only general hand signal instruction
D. Only an annual all-hands briefing

22. How must equipment covered by §1926.1441 be inspected?

A. At the operator's preferred intervals
B. Only on delivery
C. In accordance with manufacturer procedures
D. Only after a defect is reported

23. Who must ensure the signal person is trained in applicable signals under §1926.1441(f)?

A. The employer
B. The equipment dealer
C. The trainee
D. The testing lab

24. When the crew changes a forklift attachment, what should it verify before use?

A. Only that the truck can drive in a straight line
B. Only that a copy of the equipment invoice is available
C. Only that the attachment can be connected
D. Manufacturer approval when required, applicable ratings, and whether the configuration changes which rules apply

25. Which source identifies standard and critical lift planning categories for load handling?

A. ASME P30.1
B. OSHA's signal person qualification rule
C. The equipment delivery receipt
D. The site attendance log
